

# Introduction to Programming

Class 16, 27 February 2017

- **What is your astrological sign? What does it say about you?**

# Goals

**Goal 1:** You will know how to add html elements using javascript.

## Vocabulary

Document Object Model  
DOM  
Element  
Append  
Parent  
Child

## Code

```
document.createElement()  
document.body.appendChild()  
element.textContent  
element.appendChild()
```

1. Mr. Collins on Numbers (Check HW)
2. For Loop Snippets (Computers Closed)
3. Go over H28
4. Lesson on the DOM
5. Tripod Results and Survey
6. Homework is H29

**Goal 1:** You will know how to add html elements using javascript.

## basicStructure.html

```
<!doctype html>
<html>

<head>
  <title>My Title</title>
</head>

<body>
  <h1>This is a header</h1>

  <p>This is a paragraph</p>

  <script>
    // My javascript code goes here
  </script>
</body>

</html>
```

## basicStructure.html

```
<!doctype html>  
<html>
```

html

```
<head>
```

head

```
  <title>My Title</title>  
</head>
```

title

"My Title"

```
<body>
```

body

```
  <h1>This is a header</h1>
```

h1

```
  <p>Hello</p>
```

p

"Hello"

```
  <script>
```

```
    // My javascript code goes here
```

```
  </script>
```

```
</body>
```

```
</html>
```

## basicStructure.html

```
<!doctype html>
<html>

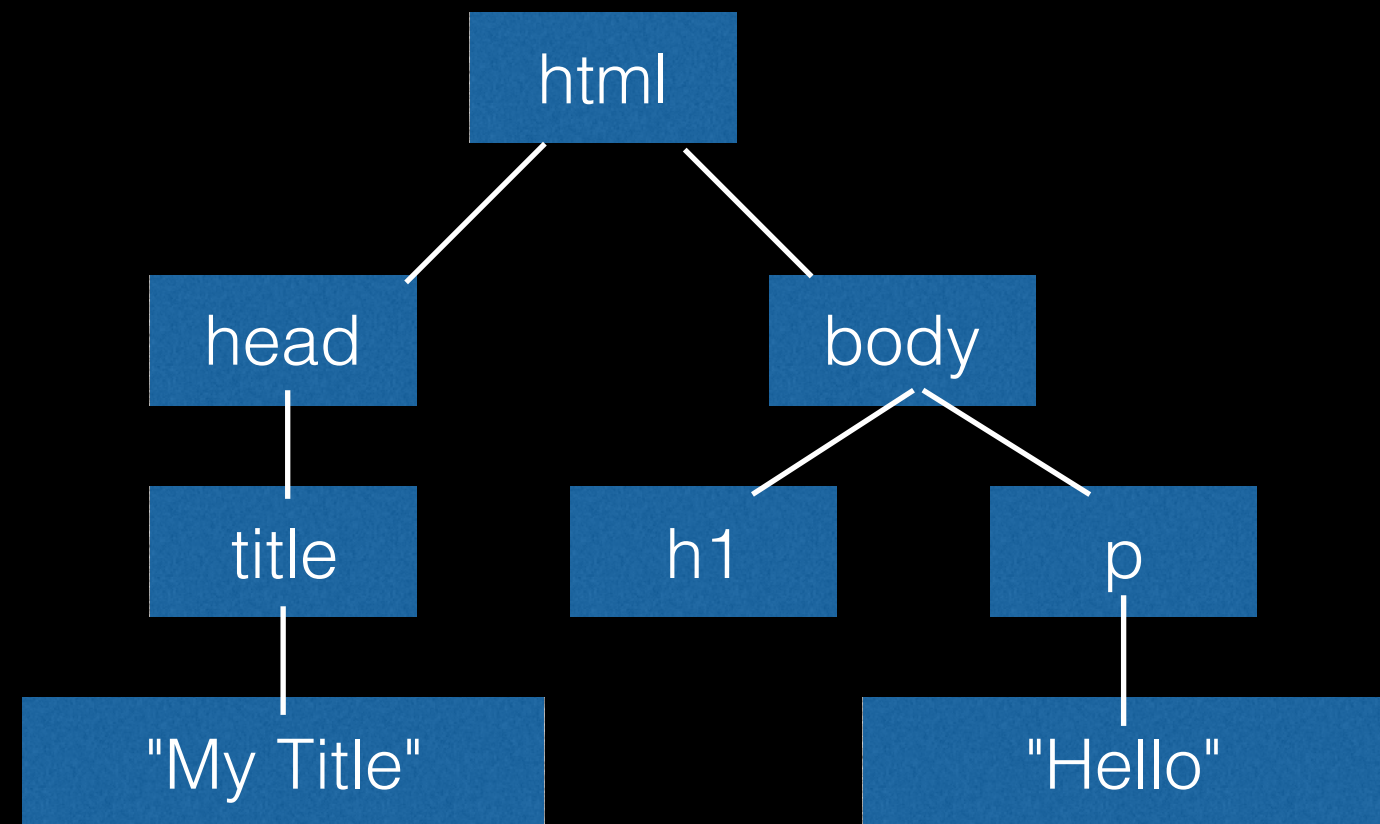

<head>
  <title>My Title</title>
</head>

<body>
  <h1>This is a header</h1>

  <p>Hello</p>

  <script>
    // My javascript code goes here
  </script>
</body>

</html>
```

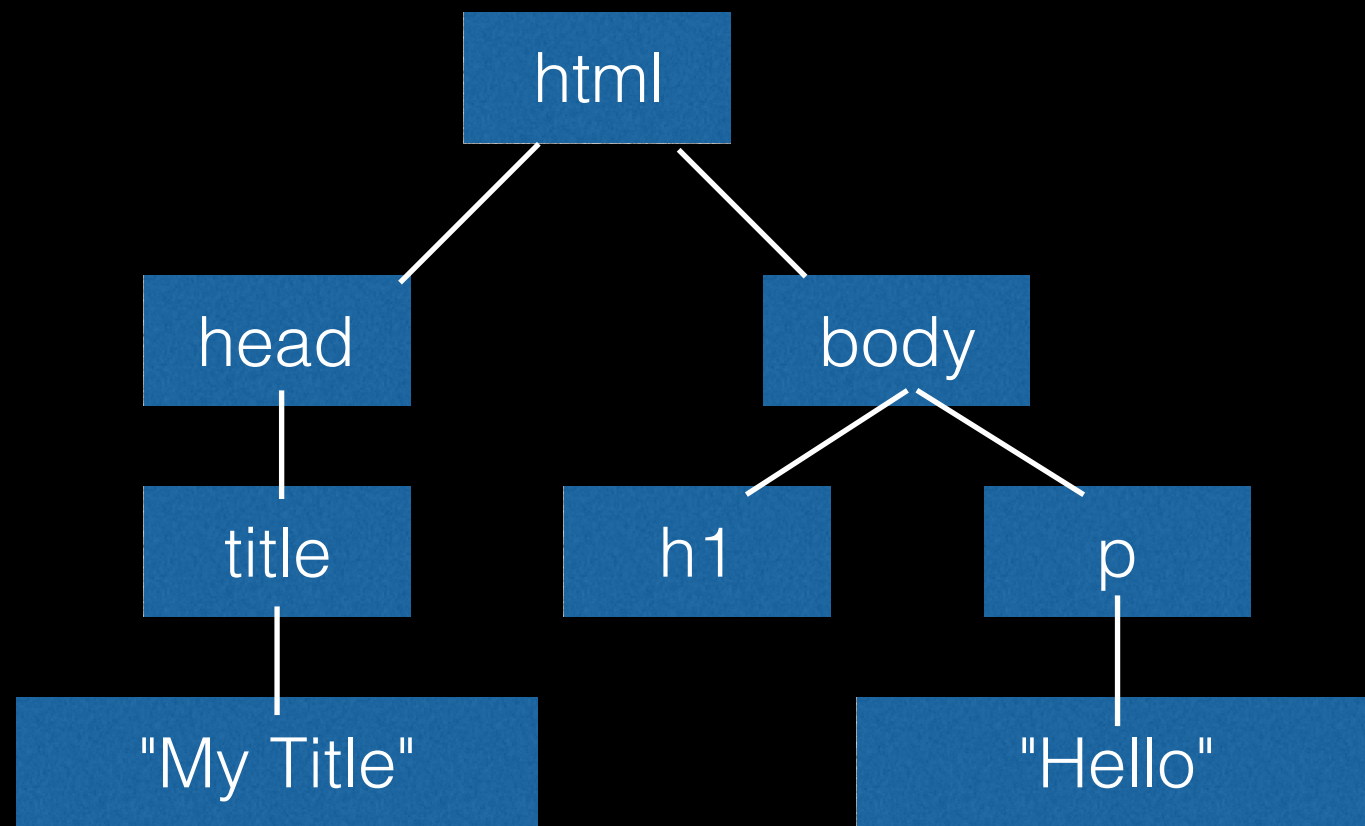

# The DOM

**html** is PARENT of **body**

**body** is CHILD of **html**

## The DOM

**body** is PARENT of **p**

**p** is CHILD of **body**

**"Hello"** is the textContent of **p**

also called innerHTML

## The DOM

In order to add **p** with text to webpage (html), you need to **CREATE** and **APPEND** each element

### CREATE

**p** is CHILD of **body**

```
var myP = document.createElement("p");
```

**"Hello"** is CHILD of **p**

```
myP.textContent = "Hello";
```

### APPEND

also called innerHTML

```
document.body.appendChild(myP);
```

- **Demo**

## The DOM

In order to add **p** with text to webpage (html), you need to **CREATE** and **APPEND** each element

### CREATE

**p** is CHILD of **body**

```
var myP = document.createElement("p");
```

**"Hello"** is CHILD of **p**

```
myP.textContent = "Hello";
```

### APPEND

also called innerHTML

```
document.body.appendChild(para);
```

## The DOM

```
<html>
<head>
</head>
<body>
  <script>

    var para = document.createElement("p");

    para.textContent = "Hello";

    document.body.appendChild(para);

  </script>
</body>
</html>
```

Replaces  
**alert();**

- **Try adding the following to a blank web page:**
  - **<p>**
  - **<h1>**
  - **<ul> with <li>**

## Practice!

- Modify AddingNumbers to display the final answer on the webpage.

## Practice!

- Write a program that prompts the user for three numbers and then displays the largest number.

## largeNumber.html

```
<!doctype html>
<html>
<head>
  <title>Largest Number</title>
</head>
<body>
  <script src="largeNumber.js"></script>
</body>
</html>
```

## largeNumber.js

```
var maxNum = -1000000000;

for (var i=0; i<3; i++) {
  var userNumberStr = prompt("Please enter a number.");
  userNumber = parseInt(userNumberStr);
  if (userNumber > maxNum) {
    maxNum = userNumber;
  }
}

var message = "The largest number is " + maxNum;

var para = document.createElement("p");
para.textContent = message;
document.body.appendChild(para);
```

# Practice!

- Write a program that prompts for a name and number of times to display.

## vanity.html

```
<!doctype html>
<html>
<head>
  <title>MyName</title>
</head>
<body>
  <script src="vanity.js"></script>
</body>
</html>
```

## vanity.js

```
var name = prompt("What's your name?");
var timesStr = prompt("How many times would you like to see it?");
times = parseInt(timesStr);

for (var i=0; i<times; i++) {
  var para = document.createElement("p");
  para.textContent = name;
  document.body.appendChild(para);
}
```

# Goals

**Goal 1:** You will know how to add html elements using javascript.

## Vocabulary

Document Object Model  
DOM  
Element  
Append  
Parent  
Child

## Code

```
document.createElement()  
document.body.appendChild()  
element.textContent  
element.appendChild()
```

1. ~~Mr. Collins on Numbers (Check HW)~~
2. ~~For Loop Snippets (Computers Closed)~~
3. ~~Go over H28~~
4. ~~Lesson on the DOM~~
5. Tripod Results and Survey
6. Homework is H29
