Introduction to Programming
Class 14, 21 February 2017

Warm up:

1) **Ask the user to input the temperature in celsius.**
2) **Display a message depending on the temperature:**

temp < 5
 -> "Oooo, that's cold."
5 <= temp < 32
 -> "That's the perfect temperature."
temp >= 32
 -> "Wow, that's hot."

```html
<!doctype html>
<html>
<head>
    <title>Warm Up</title>
</head>
<body>
    <script>
    /* A warm up exercise */

    // Get user input
    var tempString = prompt("What's the temperature");
    var temp = parseInt(tempString);

    var message;
    if(temp < 5) {
        message = "Oooooo, that's cold.";
    } else if (temp >= 5 && temp < 32) {
        message = "That's the perfect temperature.";
    } else if (temp >= 32) {
        message = "Wow, that's hot!";
    }

    alert(message);
    </script>
</body>
</html>
```
